NOTES: The number of citations is based on a three-year lag with a 12-year window of articles in a comprehensive set of journals numbering approximately 5,000 covered by the Institute for Scientific Information. For example, the 2000 citations would be patents issued in 2000 citing papers between 1997 and 1986, and so forth. Percent share refers to the share of the cited paper's scientific field and its nationality based on the institutional address of the cited paper. Science field and country region is determined by CHI's field classification of the journal and the institutional address of the cited publication.
